

WP1 PREPARATION

VTSNIS will take part in identification of Western Balkans regional issues related to traffic safety, workshop on innovative practices in the EU and present problems in its country, prepare the list of needed laboratory equipment, software and literature as well as analysis of existing curricula in traffic and transport engineering in WB HEIs, with the special emphasis on situation in vocational higher education.

WP2 DEVELOPMENT

VTSNIS will define admission requirements and enrolment of students, implement undergraduate curriculum, implement students' internships, implement trainings for citizens and public sector, self-evaluate implemented undergraduate curriculum and trainings, prepare an appropriate questionnaire for self-evaluation.

WP3 QUALITY PLAN

VTSNIS will with other partners prepare proposal on quality control plan and will adopt it. The regular meetings of QAC will contribute to the maintainance of the quality of project work. Each HEI will have its own representative in QAC and will also participate in internal control.

WP4 DISSEMINATION & EXPLOITATION

VTSNIS will disseminate project results, obtain accreditation/reaccreditation of undergraduate curriculum and promote modernized curriculum and developed trainings for traffic safety professionals. It will send students to attend the winter/summer school in LUT and OU.

WP5 MANAGEMENT

UNS and VTSNIS will participate in kick-off meeting and SC meetings, discuss and adopt the guide lines on project management and reporting, perform day-to-day activities in local team, perform control on financial transactions received by coordinator, prepare reports related to their activities (including inter and final reports).
